

Measuring Guide for a Kitchen

Please provide the following information (in inches) by making a drawing like the one below

Measure:

- All walls “length” (corner to corner) – **do not** measure existing cabinets or counter tops
- All walls “height” (Floor to ceiling)
- Width of all appliances, PLUS the Height of the Fridge
- Location of all appliances (from a corner)
- Location of any doors and windows (window width and height AND off the floor)
- If you are removing walls, account for 5” for that space
- This process applies to Bathrooms, Laundry, Outdoor Kitchens or Garage

Please have photos of the space, taken from a distance to show all existing cabinets

Any questions call or text to Joe: 203.247.2008

Email: Joe@UFD1.com

Overview Information:

- **Wall Cabinet Color:** _____
- **Base Cabinet Color:** _____
